NEW
New item for 2014.

INNOVATION
An item BRP pioneered that takes your ride to the next level.

DID YOU KNOW
An interesting tidbit about an item beyond the product description.

Read the Side-by-Side vehicle (SSV) and All Terrain Vehicle (ATV) Operator's Guides and watch the Safety DVD before driving. BRP highly recommends that all-terrain vehicle (ATV) drivers take a training course. ATVs can be hazardous to operate. For both ATVs and side-by-side vehicles (SSVs), the operator and passenger should wear a helmet, eye protection and other protective clothing. Respect the minimum age as required by law. For SSVs, fasten lateral net and seat belt at all times and passenger must be at least 12 years old and able to hold handgrips and plant feet while seated against the backrest. Never carry passengers on any ATV not specifically designated for such use. For ATVs, BRP recommends not to carry any passengers under the age of 12. Make sure that all laws, regulations, and BRP's warnings / recommendations for ATV and SSV passengers are respected. Always remember that riding and alcohol/drugs don't mix. Never engage in stunt driving. Avoid excessive speeds and be particularly careful on difficult terrain. Ride responsibly. BRP urges you to "TREAD LIGHTLY" on public and private lands. Preserve your future riding opportunities by showing respect for the environment, local laws and the rights of others when you ride. Always ride responsibly and safely. Never carry passengers on any ATV not specifically designated for such use. Highly skilled operators under controlled conditions appear in this brochure. Do not attempt these manoeuvres if they are beyond your skill level. Pictures taken outward, on private land. BRP reserves the right, at any time, to discontinue or change specifications, prices, designs, features, models or equipment without incurring obligation. LAYERING SYSTEM SOLUTION

Layering with performance gear keeps you dry, warm and comfortable when riding an ATV or a SSV – whether blasting dunes, cruising trails or plowing snow.

HOW IT WORKS

BASE LAYER

Because it is closest to your skin, the base layer is the foundation of the system. Specially designed fabrics move moisture away from your skin and cool or warm you, depending on your riding style.

MID LAYER

Add more warmth by adding an insulating mid layer, such as a technical fleece.

OUTER LAYER

This layer protects you from the elements in all conditions and is generally waterproof, windproof and breathable. For colder conditions, the outer layer can include additional insulation, like our Winter gear.

OUTER LAYER TECHNICAL TERMINOLOGY

RPM TECHNOLOGY

BRP developed its own waterproof/windproof/breathable technology specifically for powersports gear: RPM.

It's a special coating that prevents wind and moisture from entering while allowing sweat to escape. The key is that it is specifically designed for powersports, not slower, less rugged use. Garments labeled RPM MAX also have 100% of their seams and logos sealed, so water can't enter through their potential openings.

Critical seams and logo sealed

All seams and logo sealed

TEFLON

We use a Teflon coating on some garments. It's extremely slippery, so water, dirt and stains slide right off. Teflon HT maintains its performance up to 30 washes, compared to other coatings that last only one to five washings.

HIPORA

Windproof, breathable and waterproof membrane that features unique polyurethane coating technology and delivers excellent moisture management.

PRIMALOFT INSULATION

When it comes to insulation, we choose the best. We choose PrimaLoft.

WARMER

Ultrafine fibers form tiny air pockets that trap body heat, keeping you warm. As warm as goose down.

SOFT

Ultrafine fibers flex easily, so garments are flexible and move easily.

BREATHABLE

Moisture vapor is transported through the fine fibers and away from the skin.

WATER RESISTANT

PrimaLoft insulation dries faster than goose down because its fine fibers create a tight surface tension that resists moisture penetration.

PRIMALOFT ONE

Warmer – wet or dry – than any other synthetic insulation. This ultimate down-like microfiber insulation is quick drying, soft and breathable. It is also very lightweight, compressible and thermally efficient.

CRESTA BY PRIMALOFT

PrimaLoft Cresta offers warmth without weight and extra bulk. It is designed to keep you warm and comfortable throughout the day.

WE HAVE FOUR DIFFERENT TYPES OF CAN-AM OFF-ROAD RIDING GEAR BASED ON YOUR RIDING STYLE AND THE OUTSIDE TEMPERATURE. **HERE'S HOW TO GET THE RIGHT GEAR TO MAXIMIZE YOUR EXPERIENCE:**

STEP 1 IDENTIFY YOUR RIDING TYPE

PERFORMANCE

In active riding – sand, mud or rocky – you need highly breathable gear that wicks perspiration away from your skin.

ADVENTURE

Riding longer distances, you and your passenger need ergonomic, versatile gear that adjusts to changing conditions.

RECREATIONAL

You want great value and dependable performance for either work or play riding.

WINTER

ADVENTURE

RECREATIONAL

You don't put your vehicle away when the temperatures drop. Adventure and Recreational gear comes in warm Winter styles.

STEP 2 MATCH YOUR GEAR WITH A BASE LAYER THAT MATCHES YOUR RIDING TYPE

ACTIVE BASE LAYER

PERFORMANCE ADVENTURE

- Never feel too cold or too hot with X-Static⁺-treated fabric.
- Stay dry even on intense rides.
- Large mesh areas keep your thermal balance.
- Odour-free, anti-bacterial and anti-static.

ULTRALIGHT BASE LAYER

ADVENTURE RECREATIONAL

- Stay dry with coconut fiber fabric.
- Garment remains odour-free.
- Mesh areas keep your thermal balance.

THERMAL BASE LAYER

ADVENTURE RECREATIONAL

- Insulate your body for optimal warmth in cooler conditions.
- Slight brushing on the interior traps heat and provides softness and warmth.

SOCKS

PERFORMANCE ADVENTURE RECREATIONAL

- Ultralight socks keep your feet dry in all types of riding.
- Thermal socks add warmth in cooler conditions.

TECHNICAL WEAR

SELECT THE LAYER CORRESPONDING TO YOUR RIDING STYLE

ACTIVE BASE LAYER

You are an intense, active rider, which causes you to sweat.

MEN'S ACTIVE BASE LAYER

- X-Static silver technology on the fibers regulates your temperature by conducting body heat out in warm weather and reflecting body heat back to the skin in cold weather.
 - Permanently treated for long-lasting antibacterial performance undiminished even after 250+ washes.
 - Silver woven into fiber immediately binds with odour-causing agents such as ammonia and denatured proteins to instantly reduce odour.
 - Mesh panels in specific areas for better ventilation and accelerated drying.
 - Compressed for added comfort.
- 92% Polyester, 6% Spandex, 2% X-Static[†]

Cotton does not breathe effectively and traps moisture on your skin, cooling you further. Can-Am Synthetic base layers keep you dry and warm.

ULTRALIGHT BASE LAYER

If you're currently wearing casual clothes that absorb sweat, leaving you damp and cold, you will benefit from a lightweight stay-dry layer like this.

Coconut fiber actively promotes evaporative cooling and odour absorption, and filters moisture out while trapping warmth in.

MEN'S ULTRALIGHT BASE LAYER

- Mesh panel in specific areas for better ventilation and accelerated drying.

SIZING CHART
RIDING GEAR

HOW TO MEASURE

For best results, have someone else take measurements. Measure body in underwear. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

Chest/Bust	Waist	Gloves	Inseam	Arm length	Head
Measure under your arms, around the fullest part of your chest.	Measure around your natural waistline, keeping one finger between the tape and body.	Measure palm width.	Without shoes, from crotch to the floor.	Hand on hip, from centre back neck bone, along shoulder point around elbow to bottom of wrist bone.	Around your head, from the centre of the forehead, above the ears and over the natural bump at the back of the head.

MAKE THE RIGHT CHOICE

BRP’s commitment to quality means that every vehicle is engineered to the highest standards of reliability. Nevertheless, a lack of proper maintenance can cause even the best components to fail eventually. **By using original BRP maintenance parts, you are taking care of your investment.**

Recommended
periodic maintenance
schedule

Going to your BRP dealership for regular maintenance servicing can prevent bigger and more expensive repairs in the long run. Just follow the recommended maintenance schedule. It was designed by experts who understand your ATV / SSV and know exactly how to keep it in top form.
